A large seal, possibly a fur seal, is resting on a piece of ice in a snowy, mountainous landscape. The seal is the central focus, lying on its side with its head resting on the ice. The background shows a vast, snow-covered landscape with mountains in the distance under a clear sky. The overall scene is serene and captures a moment of nature in a cold environment.

Zodiac cruising

Sometimes **the best way to see Antarctica's spectacular landscapes and wildlife**

(especially if the wildlife has not left you any room on the beach, i.e. penguins!) is from the Zodiac with your expert Swan Hellenic expedition team interpreting the wonders.

Hiking

Rugged landscapes and/or glaciers and snow mean hiking excursions in Antarctica only happen occasionally. However, whenever there's an opportunity **to explore Earth's last great wilderness on foot, we seize it.**

Generally, there are no trails but your experienced expedition guides will know the best places to hike, and enrich your experience along the way by sharing their knowledge.

Citizen Science

The planet's polar regions are being presented with huge challenges in the face of climate change **Scientific research here is crucial.**

Becoming involved in the onboard Citizen Science Programmes is your chance **to help collect important data,** and give back to these precious environments.

Expedition laboratory

This is where Citizen Science comes in. Head to our onboard lab to meet our guest researchers. Gain **a deeper understanding of the important scientific work** being done and get hands-on polar region research experience.
